Subject: RE: DSFP MSA rev 0.5 - comments and IP declaration

Dear DSFP MSA Members,

Below is the IP notification form Finisar legal:

Pursuant to the notification requirements of Section 9 of the DSFP Multi-Source Agreement (the "Agreement"), Finisar hereby provides notice that it reasonably believes that it has patents and/or patent applications that may include one or more Essential Claims, as that term is defined in Section 6.7 of the Agreement, directed towards features of the Dual Small-Form Factor Pluggable (DSFP) module design as currently contemplated in the draft DSFP Specification. These patents include US Pat. Publication No. US 2017-0179627 A1 as well as any foreign counterparts. Finisar hereby agrees that if such patents and/or patent applications have Essential Claims, then Finisar will grant a license on reasonable and non-discriminatory terms to entities requesting such a license only to the extent required under Section 8 of the Agreement. Finisar reserves the right to provide further and more detailed notifications pursuant to the Agreement as necessary.

I would like to suggest to those Members that have not made an IP declaration, but view that they have relevant IP, please consider doing so now.

Thank you

Chris

Dear DSFP Members,

YAMAICHI provides the following IP declaration for as per the signed MSA document; in relation to the most recent DSFP draft specification (rev 0.5), YAMAICHI is stating its belief that the PCT/JP2017/044956, could include essential claims.

Let me know if you have any questions,

Keiko Kaiho

Hello Ali and Everyone,

TE provides the attached comments to the draft specification.

In addition, TE provides the following IP declaration for this draft; in relation to the most recent DSFP draft specification (rev 0.5), TE is stating its belief that the patent family including US patent 6517382 (and including US patents 7074082, and 6524134), could include essential claims.

Let me know if you have any questions,

Nathan
